

Less Energy,

MORE SAVINGS

HERO is helping communities across California realize the promise of an energy efficient future by making the energy efficient choice the safe and affordable choice for property owners.

Simple Process

Check your property's eligibility online or over the phone. Applications can be processed quickly, so you can get started right away.

Affordable Payments

Payments are made along with your property taxes, offer tax-deductible benefits, low interest rates, and are fixed for the term of the financing you select (5-20 years).

Consumer Protections

Contractors must be trained and in good standing with the Program to offer HERO. Products are verified to meet the U.S. Department of Energy's Energy Star requirements before installation. Payment is only made to the contractor after the property owner signs a certificate assuring the project was completed to their satisfaction. In the case of a dispute, HERO provides resolution assistance.
