

FERC PROJECT No. P-1389-059
RUSH CREEK HYDROELECTRIC PROJECT
SOUTHERN CALIFORNIA EDISON, LICENSEE

**June Lake CAC LETTER ENDORSING JLRPAC, David Rosky Comment Letter On
Scoping Document SD1 and Project PAD**

May 23, 2022

BACKGROUND

On May 13, 2021, David Rosky, a member of the June Lake Citizen's Advisory Committee (CAC), AKA June Lake RPAC (JLRPAC), submitted comments pertaining to the scoping of the Rush Creek Project relicensing application. These comments contained community input gathered by Mr. Rosky as the contact person for this issue on the CAC. At the time of submission, however, it was not yet possible to obtain the endorsement of the CAC due to the inability to hold a committee meeting after preparation of the comment letter and before the FERC submission deadline. This was due to limitations of California's Brown Act, which involves complex noticing requirements that make short-notice, informal, or email-only proceedings impossible.

LETTER OF ENDORSEMENT

The purpose of this letter is to provide an endorsement of Mr. Rosky's comment letter by the June Lake CAC.

Respectfully,

Julie Brown
Chair, June Lake CAC
